Electricity Rate List

Minimum & Energy Charge

1. Consumer Group

1.1. Single Phase (230V)

kWh (monthly)	5 Ampere		15 Ampere		30 Ampere		60 Ampere	
	Minimum Charge Rs.	Energy Charge (Rs. per kWh)	Minimum Charge Rs.	Energy Charge (Rs. per kWh)	Minimum Charge Rs.	Energy Charge (Rs. per kWh)	Minimum Charge Rs.	Energy Charge (Rs. per kWh)
0 to 20	30	0	50	4.00	75	5.00	125	6.00
21 to 30	50	6.50	75	6.50	100	6.50	125	6.50
31 to 50	50	8.00	75	8.00	100	8.00	125	8.00
51 to 100	75	9.50	100	9.50	125	9.50	150	9.50
101 to 250	100	9.50	125	9.50	150	9.50	200	9.50
Above 250	150	11.00	175	11.00	200	11.00	250	11.00

Note: If 5 Ampere consumers consume more than 20 kilowatt-hour: units, they must pay an energy charge of 1 to 20 kilowatt-hour: units at the rate of Rs. 3.00 per units.

1.2. Three-face Lower Voltage (400V)

kWh (monthly)	10 KiloVolt Ampere			Above 10 KiloVolt Ampere		
	Minimum Charge Rs.	Energy Charge (Rs. per kWh)		Minimum Charge Rs.	Energy Charge (Rs. per kWh)	
		Ashad to Kartik	Mansgir to Jesth		Ashad to Kartik	Mansgir to Jesth
Any	1,100	10.50	11.50	1800	10.50	11.50

1.3. Three-face Medium Voltage (33/11 KV)

kWh (monthly)	10 KiloVolt Ampere		
	Minimum Charge Rs.	Energy Charge (Rs. per kWh)	
		Ashad to Kartik	Mansgir to Jesth
Any	10,000	10.50	11.50

2. Others Consumers

2.1. Lower Voltage Level (220-400V)

S.N.	Consumer Group	Demand Charge (Rs. per KVA per month)	Energy Charge (Rs. per kWh: units)
1.	Industrial		
	a. Rural & Local Industry	60	7.80
	b. Small Industry	110	9.60
2.	Commercial / Business	325	11.20
3.	Non-Commercial / Non-Profit	215	12
4.	Irrigation	0	2.25
For more detail list you can see the official NEA website consumer tariff data https://nea.org.np/en/pages/consumer-tariff-rates			

VAT Rate

Categories	VAT Rate (%)
Domestic/Household	5%
Industrial/Commercial/Others	13%

First of all, you must have to read the electric meter and find out units consumed & the category of consumer. Then, Subtract the present reading from the previous reading you'll get total units consumed. Then, you have to calculate the energy charge as per the chart above according to different units of electricity consumed. Find out the Minimum charge according to the units consumed from the chart above. As per new rule to add tax above 50 units, you have to calculate the energy charge for the first 50 units and subtract from total energy charge consumed and add minimum charge to it and according to the consumer category calculator vat amount from it with suitable vat rate. Finally, add all Total Energy Charge, Minimum Charge, VAT Amount gives you Bill Amount.

Lets clear with an Example:
Suppose Our current reading is 1345 and previous reading was 1215 on the 5 Ampere/Domestic meter.

Here, Present reading = 1345

Previous reading = 1215

Total unit consumed = Present reading - Previous reading

= 130 units

Energy Charges = 20×3 + 10×6.50 + 20×8.00 + 50×9.50 + 30×9.50

Note: If 5 Ampere consumers consume more than 20 kilowatt-hour: units, they must pay an energy charge of 1 to 20 kilowatt-hour: units at the rate of Rs. 3.00 per units.

= 60 + 65 + 160 + 475 + 285

= 1045

Minimum Charges = 100

Total Amount = Energy Charges + Minimum Charges

= 1045 + 100

= 1145

VAT Free Amount (First 50 units) = 20×0 + 10×6.50 + 20×8.00

= 225

VAT Amount = 5% of (Energy Charges - VAT Free Amount)

= 5% of (1045 - 225)

= 5/100 × 820

= 41

Bill Amount = Total Amount + VAT Amount

= 1186
